PROFESSIONAL SUMMARY

Full Stack Developer (MERN) with 2.3 years of hands-on experience building real-time apps, secure auth flows, scalable REST APIs, a delivered chat systems for 1000+ concurrent users using Socket.io/WebRTC and optimized app performance by 30% via caching and query tuning; fluent in English & Hindi. Currently expanding expertise in Next.js for building high-performance, SEO-friendly applications.

WORK EXPERIENCE

Skillheed Company (Full-Stack Developer) 2024 - 2025

- Delivered real-time chat/notifications using Socket.io and WebRTC, sustaining 1000+ concurrency with sub-second delivery under load.
- Live Stream Chat App — Node.js, Socket.io, Kafka, WebRTC: Group/private chat, presence, typing, receipts; 1000+ users; 1:1 video calling; resilient reconnection strategies.

Edurom Company (Full-Stack Developer) 6 Months

- Built role-based LMS with Admin/Teacher/Student logins, JWT/RBAC, and granular permissions across modules and routes.
- Admin: lesson plan create/approve, class/section/timetable setup, events/calendar, and school-wide monitoring dashboards with audit logs.
- Teacher: class-wise home assignments, lesson tracking, attendance (present/absent), and student monitoring with actionable insights.
- Student: assignment submissions, leave requests, timetable and announcements with clean UX for higher engagement and fewer support requests.

A2V Groups Company (Full-Stack Developer) Now

- Acts as solo owner for multiple client projects: gathers requirements, designs schemas/APIs, builds React frontends, Node/Express backends, and deploys on cloud with environment-specific configs.
- Establishes reusable templates for auth, payments, file uploads, and RBAC to accelerate delivery across engagements while maintaining code quality.
- Ensures on-time or early delivery through scoped milestones, API contracts, and measurable SLAs for performance and availability.
- Built real-time group and private chat with Socket.io and Kafka patterns, reliably supporting 1000+ concurrent users under peak loads.
- Delivered multiple greenfield projects as sole full-stack owner—requirements, frontend, backend, infra, and deployment—consistently before deadlines.
- - Working with Next.js to build SEO-friendly, high-performance web applications using SSR and modern routing features.
